

BUILDING MATERIALS

WOODEN DOOR

Surface: MDF with natural veneer
 Inner core: Chip board or half-filled solid wood
 Dimension: 800/900/1000mmx44 mm (door leaf)
 Frame: 42 mmx156 mm
 Casing: 12x60mm
 Includes: door slab, frame, casing and painting charges

MEDIUM DENSITY FIBREBOARD (MDF)

Medium Density Fibreboard is an engineered wood product made by breaking down hardwood or softwood residuals into wood fibres. It is durable and good choice for many woodworking and carpentry projects like shelving and storage cabinets. This is ideal to use in furniture, lockers, benches, doors, wall cladding, labs, hotels and office equipment

PLYWOOD

SELKARPLEX

Film faced plywood can be used in formwork for 10 to 15 times. Hardwood core, WBP glue, Dyneabrown film. 18 mm, 11 core + 2 film layers

ALTINPLEX

Film faced plywood can be used in formwork for 8 to 11 times. Combicore, WBP glue, Dynes brownfilm. 18 mm, 5 hardwood/6 poplar core + 2 film layers

PARQUET

Parquet is a geometric mosaic of wood pieces used for decorative effect. Parquetry uses are as veneer patterns on furniture and block patterns for flooring. Parquets are solid and semi solid engineered wooden flooring available in different colors and sizes

MARBLE TILES

Marble is commonly used for internal and external wall cladding purposes, landscaping applications such as patio, swimming pool and walkway tiles or pavers. Marble tile is also used to decorate residential fireplaces and bathrooms. Commercial applications of marble are, hotel foyer decoration, table tops, counter tops, bathrooms and kitchens.

CERAMIC TILES

Ceramic tiles are ideal choice for kitchens, baths, basements, porches, laundry rooms and other moisture – prone areas. An array of colors, patterns, shapes and sizes is available.

GRANITE TILES

Granite remains the top choice for kitchen counter tops and widely used for flooring and wall tile applications. Due to its exceptional strength, it is well suited for exterior applications such as cladding, paving and curbing. Granite tiles are available in different colors and patterns.

PORCELAIN TILES

Porcelain is much harder than ordinary ceramic tiles. It can be used in dry areas such as wall murals, dados and less traffic zones. The density and composition of porcelain tile allows it to be used in a variety of applications indoor and outside in the most extreme weather conditions. Porcelain tiles are available in different patterns and categories.
